

The  
Bull Buyers Guide  
For  
Commercial Cattleman  
&  
Seedstock Producers

**BULL**  
**BUYERS GUIDE**

Version 1.0

**O**ne day it just hits you. That solution to that one problem that no one knows they have. Now - what do I do with this solution? How will the persons that have this “problem” want this solution when they don’t even know that it is actually their problem... See it’s all a conundrum - a circle of tails chasing each other down a whole.

As a Commercial Cattleman, when looking through all the Bull Catalogs - the countless stacks of Bull Catalogs that fill my mailbox from the End of October on through Christmas and into the late spring, plus all the emails of Bull Sales - I get this sinking feeling that I am missing something. Either I am leaving money on the table or I am not getting the best genetics or the best bulls that my money can buy.

So as a Seedstock Producer - am I leaving money on the table? Are my genetics better than the money I am getting? How do I reach that Commercial Cattleman and convince him that my genetics are what he is looking for. I have sent everyone on my mailing list my expensive catalog, all my contacts have been emailed the sale bill, and the website is up to date as well as all my bull’s EPDs in the Breed Associations database.

Currently there are only so many cows 31.7 million (+/-). We are not making any more cows in the near future. But it sure seems like there are more and more Seedstock Producers vying for the opportunity to breed the 31,700,000 cows. It is getting very very competitive. Cutthroat

Welcome to the free market enterprise - capitalism at its best, where solutions to problems that you didn’t even know you had, come and make it easier to do a very simple task. Like -

## **- Finding the right Bull -**

How hard can that be? Are there databases that can be searched to selectively find the right bull without manually inputting in every single number for every single EPD. Or do you just read the \$ EPDs and make your decision off of that data. They were developed to make it easier. Are you just as informed about every aspect of the bull you are about to sell or purchase. EPDs / Data, visual

verification, judging, are all part of the system to make sure that this is the right bull.

**E**pd's are a great tool. When used properly, they will give us the data we need to make a very informed decision about the bulls we are about to sell or buy. But just how easy is it to look up and sort through the EPD Data to find that right bull. Virtually every Breed Association has a website that has a database of every registered bull that will be for sale.

When using the Breed Associations sorting tools - do you find what you are looking for? This is Bull Sorting version 1.0. It is the DOS compared to Windows/Mac (dating myself), Coal fire engines to Tesla. Open top bumper pull livestock trailers compared to covered aluminum 32 foot goosenecks.

When using a Seedstock Producer's catalog of bulls and their EPDs - how easy is it to find and sort the genetics that will match your herd's genetics? How about the Seedstock Producers websites? There are very few that have a simple search box or Excel Spreadsheet that will help to sort their Bulls - And What if ALL the Seedstock Producers had a simple search to find the Right Bull just in their own lineup?

But what about comparing one Seedstock producer's genetics to another Seedstock producer's genetics?

The technology is here to make it easier to find the Right Bull by the process of eliminating all the Wrong Bulls. It is done with the EPDs so there still needs the visual verification, the judging to make sure the bull is right. But this will get you started on the right path to finding that Right Bull.

**F**or the Database to work - Seedstock Producers must be willing to put their EPD data out there to be scrutinized and judged, ranked and sorted. The more Seedstock Producers that do this, the better the database will be. The Database will give everyone an even playing field where even the smallest Seedstock Producer with quality genetics will be able to compete with every other Producer. More so, each Seedstock Producer must be willing to take credit as well as

criticism and that it will be documented for all to see in the form of a review. - The industry is as competitive as it has ever been and transparency is very relevant.

**N**o distractions. The website database will have the look and feel of its one function - to Find the Right Bull. Flashing ads and paid searches are irrelevant here. Each Seedstock Producer will have their own Profile page depicting the story of their being. The Annual subscription will be valued so that every Seedstock Producer will be able to afford the amenity. The security will be so that only you can modify your data. And that only certified buyers will be able to leave a review of your business.

This is Bull Sorting 2.0

The Commercial Cattleman will be able to sort the EPD data through a simple slide process of eliminating the Bulls that do not fit within the desired search parameters. When starting the Search - the Commercial Cattleman will be faced with every bull available to them within a radius of their choosing from their zip code.

All 40+/- EPD parameters - Birth weight, weaning weight, yearling weight, Rib Eye, Feed Efficiency, total EPD Accuracy, and the rest of the relevant EPDs will be listed in 1 column.

Each EPD will be represented by a number line. On each **END** of the number line there will be a button that can be moved, left/right. Move the button on the left to the right and the minimal number will be increased for that EPD. Move the button on the right to the left and the maximum number will be decreased for that EPD.

Take a minute and visualize this concept. 

As the Commercial Cattleman scrolls down the column - they will be able to modify each EPD search parameter - And each time an EPD number line is modified the search results will repopulate the results to fit the new sort criteria. Not enough or too many results - change the radius of miles from your zip.

All done in Real Time On any Device anywhere there is an Internet Signal.

### Bowman Angus Reviews

Kit - Wyoming 2019

"Lyle works with you to get the bulls you want. The sale format was great - bulls were priced reasonable. Great value"

Fred - Colorado 2017

"Bowman bulls served their purpose. They got the cows bred and the calves were the right size. 5 stars."
